Earth Overshoot Day 2019

- Earth Overshoot Day marks the date when humanity exhausts nature's budget for the year. Once the date has passed, we will be working in overdraft. For the rest of the year, we will maintain our ecological deficit by drawing down local resource stocks and accumulating carbon dioxide in the atmosphere.
- Earth Overshoot Day 2019 – July 29.

nothing's going to get better.
It's not.”*
